

PUBLIC TRANSPARENCY REPORT

2023

Perpetual Asset Management, Australia

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Perpetual has undergone significant changes to its business over recent years. In our asset management business, we have grown from an Australian-focused investment manager to become a truly global manager of investment boutiques offering world-class investment capabilities across equities, credit and fixed income and multi asset strategies, across multiple markets.

At front of mind for us in undertaking this growth was strengthening further our commitment to responsible investment, or ESG - a global trend we believe will only continue to grow strongly into the future.

The acquisitions of ESG pioneer Trillium Asset Management in 2020, and in 2022 the Pental Group (which includes ESG engagement and impact specialist Regnan) are testament to this. We recognise that each investment boutique within the Perpetual Group has a commitment to ESG as an intrinsic part of their individual investment approach. As a result, the Perpetual Group now encompasses a number of individual distinct PRI investor signatories, offering a diverse range of ESG strategies and products to our clients.

Within Perpetual Asset Management Australia, each of our investment teams has continued on its ESG journey over the reporting year. We continue to progress our ESG integration and stewardship activities across equities and credit and fixed income. In particular, our Australian equities proprietary research team's increasing focus on climate and other environmental themes reflects the increasing materiality of ESG issues to their investment decision making. We continue to engage and advocate regarding ESG issues where we can have an impact on material investment issues.

We remain committed to expanding our ESG knowledge and expertise across the Perpetual Group. While we have achieved significant ESG milestones to date, we believe harnessing our now-considerable ESG capabilities across the business will present some exciting opportunities for our clients to exercise their demand for products that align with their ESG expectations.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Perpetual Investments (now Perpetual Asset Management, Australia) was recognised as a "Responsible Investment Leader" in Australia/New Zealand by the Responsible Investment Association Australasia (RIAA) in RIAA's most recent assessment. RIAA state "Responsible Investment Leaders demonstrate a commitment to responsible investing; the explicit consideration of environmental, social and governance (ESG) factors in investment decision making, strong and collaborative stewardship; and transparency in reporting activity, including the societal and environmental outcomes being achieved."

Within Perpetual Asset Management, Australia we continue to progress our ESG integration and stewardship activities and our range of dedicated ESG products.

Our Australian equities proprietary research team's increasing focus on climate and other environmental and ESG themes in its research work has been a feature.

The team's primary ESG integration and engagement tool, the ESG Workbook, continues to be embedded into the investment process. Similarly the Credit and Fixed Income team now fully incorporate their ESG Risk scoring process into their assessment of corporate credit issuers. In terms of dedicated ESG products, we now offer investors Australian equities (including a listed investment company alternative), credit and multi-asset products.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

With the recent acquisition of the Pandal Group, Perpetual is now reviewing our considerable responsible investment capabilities across the Perpetual Group to consider our responsible investments priorities for the near future. The specific responsible investment commitments resulting from this work will be communicated externally in due course.

Internally managed

(E) Fixed income – SSA

We have been focused on developing further our ESG integration in fixed income – corporate assets policies and processes. Integration in SSA (i.e. sovereign assets) will potentially require a quite different process. We also invest only in high-credit quality SSA issuers where credit risk (including that driven by ESG factors) is typically low. So this issue may be explored further in the future but it is not a priority for us currently.

(G) Fixed income – securitised

We have been focused on developing our ESG integration in fixed income – corporate assets policies and processes. Integration in securitised assets will potentially require a quite different process. The intent of our Responsible Investment Policy is to integrate ESG where relevant and material to an asset class however these are difficult assessments in terms of these securitized assets. ESG relevant and materiality in terms of the investment prospects for these assets is not immediately apparent. This issue may be explored further in the future but it is not a priority for us currently.

(H) Fixed income – private debt

We have been focused on developing our ESG integration in fixed income – corporate assets policies and processes. Integration in private debt assets will potentially require a quite different process. The intent of our Responsible Investment Policy is to integrate ESG where relevant and material to an asset class however these are difficult assessments in terms of these private debt assets. This issue may be explored further in the future but it is not a priority for us currently.

(O) Other

We do not incorporate ESG factors for cash and cash-enhanced investments.

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

It is our policy that investment managers should incorporate ESG issues into investment analysis and decision-making where relevant and possible to each investment capability and asset class.

In enacting this policy, ESG will be relevant to all our fundamental, active investment capabilities where these issues are assessed by PAMA personnel to be a factor that may impact the current or future financial performance of an investment. 'Incorporate ESG issues' typically refers to an analysis of:

- What ESG issues the investment is exposed to and whether any of these factors present risks to the investment's current or future financial performance;
- What impact ESG issues are likely to have on the investment's prospects; and
- How well ESG issues are being managed by the company, and therefore how likely the possible impacts are to occur.

This process includes climate change. For example, companies contributing to global warming (for example fossil fuel companies) face increasing regulation, higher costs and other hurdles that will curtail growth.

- How well ESG issues are being managed by the company, and therefore how likely the possible impacts are to occur.

This process includes climate change. For example, companies contributing to global warming (for example fossil fuel companies) face increasing regulation, higher costs and other hurdles that will curtail growth.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

Our investment managers considering ESG factors (including climate change) in the way described in this section can have three possible outcomes:

1. The risks are too high compared to the likely reward and so the investment is not made, or is fully or partly sold.
2. The risks are significant but the likely reward is sufficient compensation for the risk and so an investment is made or is held.
3. The risks are low (immaterial) and so ESG factors are not a major consideration in making the investment decision.

(2) Describe how this process is integrated into your overall risk management

Our investment managers considering ESG factors (including climate change) in the way described in this section can have three possible outcomes:

1. The risks are too high compared to the likely reward and so the investment is not made, or is fully or partly sold.
2. The risks are significant but the likely reward is sufficient compensation for the risk and so an investment is made or is held.
3. The risks are low (immaterial) and so ESG factors are not a major consideration in making the investment decision.

The Credit and Fixed Income team's ESG Risk approach addresses potential investment outcomes and/or portfolio decisions that could result from an elevated ESG risk score. This is a three step process, whereby the analyst/Portfolio Manager assigns an ESG risk materiality score, performs periodic reviews and conducts ongoing ESG risk monitoring. Potential outcomes following this risk management process include, but are not limited to: not approving credit to be included in the list of approved securities, requiring a higher price premium to compensate for an elevated ESG risk, adjusting preference for bond tenors and capital structure placement, reducing portfolio exposure to a company, withdrawal of approval on a previously approved credit, and/or adding to a companies exposure following an ESG controversy if deemed that the price movement overly exaggerated the impact on the credit.
