

WealthFocus Allocated Pension

PERPETUAL SHARE-PLUS LONG-SHORT

August 2024

FUND FACTS

Investment objective: Aims to provide long-term capital growth and income through investment in quality shares and taking short positions predominantly in selected Australian shares.

FUND BENEFITS

Offers broad market exposure with the potential for higher returns through the use of shorting (taking short positions) within a risk-controlled environment, and actively managed by one of Australia's most experienced investment management teams.

FUND RISKS

All investments carry risk and different strategies may carry different levels of risk. The relevant product disclosure statement or offer document for a fund should be considered before deciding whether to acquire or hold units in that fund. Your financial adviser can assist you in determining whether a fund is suited to your financial needs.

Benchmark:	S&P/ASX 300 Accum. Index
Inception Date:	January 2004
Size of Portfolio:	\$5.40 million as at 30 Jun 2024
APIR:	PER0148AU
Management Fee:	0.98%*
Investment style:	Active, fundamental, bottom-up, value
Suggested minimum investment period:	Five years or longer

MARKET COMMENTARY

The S&P/ASX300 Accumulation Index delivered a relatively flat return for August, masking a tumultuous month. Early in the month, recession fears spiked in the US due to weak data, including a contraction in the Purchasing Managers' Index and disappointing payroll numbers. The Bank of Japan's decision to raise rates to their highest level since 2007 triggered a sharp sell-off in the Nikkei 225, marking its worst decline since 1987. However, the market rebounded in the second week as data, including improved services PMI and jobless claims, alleviated recession concerns. Financials were the strongest performer, rising 1.85% and now representing 31.7% of the index. Technology also saw gains, up 7.2%, though it remains a smaller component of the index, contributing modestly. Industrials and Communications both rose by more than 3%. In contrast, concerns about slower growth in China weighed on materials and energy sectors, with energy falling 6.17% and materials dropping 1.7%.

PORTFOLIO COMMENTARY

The portfolio's largest overweight positions include Flutter Entertainment Plc, Suncorp Group Limited and Premier Investments Limited. Conversely, the portfolio's largest underweight positions include Macquarie Group Ltd (not held), Commonwealth Bank of Australia and Woodside Energy Group Ltd (not held).

HMC positively impacted portfolio performance during the reporting season, with its stock rising 9.16% following a strong result. Earnings per share slightly exceeded consensus expectations, and the company emphasized its substantial growth potential, adding \$3 billion in additional funds under management (FUM) during the period. HMC aims to double its assets under management (AUM) in its private credit platform over the next year. The company also reported increasing transactional activity in real estate and a promising pipeline in infrastructure and energy transition, presenting significant opportunities for its newly formed Energy Transition Fund.

Premier Investments delivered strong performance during reporting season up 6.49%. This marks a period of very strong performance for the stock which has outperformed the broader market by more than 3 times, up 43.50%. Premier delivered record sales and operating EBIT ahead of consensus which was further supported from their stake in Breville which delivered a good result against a subdued consumer environment. PMV has been a cornerstone of our core retail investments, renowned for its quality business model, fortified by a robust net cash balance and overseen by engaged and experienced executive leadership. PMV's strategic review signals proactive measures to assess and potentially enhance the corporate, operating, and capital structure, reinforcing its commitment to sustained excellence. The upside in the business has been further exacerbated by the proposal for a combination of Myer and Premier's Apparel Brands business comprising Just Jeans, Jay Jays, Portmans, Jacqui E and Dotti. This could be materially beneficial for both businesses as additional quality sales are incorporated under a cheaper rental format and with strong retail management expertise. Although future outcomes remain uncertain, they are expected to reflect Premier's commitment to maintaining its high-quality standing in the market.

After a period of strong performance, A2 Milk detracted from results in August, with the stock declining by -21.93%. Despite this, it has still outperformed the broader market by 8.21% over the year. The company's results met both its guidance and consensus expectations and showed that A2 navigated the China label product transition well. However, concerns arose regarding a production disruption at its key supplier, Synlait, which provides 90% of A2 Milk's infant formula and holds critical licenses for importing these products into China. This triggered a significant sell-off due to concerns that A2 will miss sales into the crucial 2H CY24 which is expected to see a pick-up in births post-Covid. Although the production and supply chain issue appear to have been largely resolved at the time of writing, the stock price remains depressed. Nonetheless, we remain optimistic about A2 Milk, given its strong balance sheet, ongoing expansion into tier 2 and 3 cities in China, as well as its entry into the U.S., all of which present substantial growth opportunities.

Whitehaven Coal Limited detracted from performance during August as the stock fell -13.34%. One of the key highlights of the result was the announced sale of 30% of its Blackwater asset for US\$1.08 billion to Nippon Steel and JFE Steel. This deal significantly reduces the company's leverage, offering more flexibility for capital management over the next few years and initially drove a 6% rally in the share price. Offsetting this was the higher than expected cost guidance for FY25 and lower than expected production guidance for the NSW assets, Qld volume guidance was in-line, and fall in the metallurgical coal price that is now the key earnings driver for the company, in conjunction with the thermal coal price. Management's FY25 guidance was impacted by higher unit costs and conservative estimates for coal sales, leading to a large drop in forecasted earnings for FY25. While there is unfortunately a near-term impact to earnings, part of the driver of higher costs is increased stripping to de-risk delivering increased production in the future, which will also drive lower operating costs. Management's ability to deliver this increased production and lower costs in FY26+ will be closely watched by the market, along with the return of excess cash to shareholders on top of the dividend payout of 50% of thermal coal earnings.

OUTLOOK

Despite markets recovering from the August turbulence, confidence remains fragile. Early September saw another decline in US stocks, particularly in the tech sector. After reaching \$130 on August 19, Nvidia's share price dropped to \$106 in early September, driven by weak manufacturing PMI data and a decrease in job openings, fuelling concerns about a slowing US economy. In Australia, GDP growth for the second quarter of 2024 was a mere 0.2%, marking the slowest expansion since the early 1990s, excluding the COVID period. GDP per capita fell for the sixth consecutive quarter. The economy has been propped up only by increased government spending and high migration rates, while consumers grapple with persistent inflation and elevated interest rates. Despite these challenges, markets remain near all-time highs, underscoring the need for continued vigilance.

The performance fee is equal to 13.98% of daily outperformance over the hurdle rate of return. The current hurdle rate is the S&P/ASX 300 Accumulation Index + 2%pa. Performance fees are accrued daily however will only be paid in the event that the Fund's return over the performance fee calculation period is positive and the performance fee accrual is positive. For further information on the calculation of the performance fee please consult the Fund's PDS.

The Ordinaries benchmark prior to 1/4/2000 was the ASX All Ordinaries Accumulation Index. From 1/4/2000 to current the benchmark is S&P/ASX 300 Accumulation Index.
