ALLIANCEBERNSTEIN[®]

AllianceBernstein (AB) is a leading global investment management firm that offers diversified investment services to leading institutions, retail investors and private wealth clients globally. We are one of the largest investment management firms in the world, with US\$692 billion in assets under management as of June 30, 2023. We maintain research, portfolio management, and client service offices around the world, reflecting our global capabilities and the needs of our clients.

As a firm, AB believes that inefficiencies in the global debt markets arise from investor emotion, market complexity and conflicting investment agendas, and that the resulting mispricings in countries, sectors, securities and currencies provide the largest probability of generating alpha. AB uses a powerful combination of both quantitative and fundamental research to identify and exploit these inefficiencies, as it believes this combination provides higher and more reliable alpha than either discipline can provide separately. AB believes that broad global diversification across interest rate and credit cycles (maintaining a disciplined balance between the two risks) is the key to lowering overall volatility in core fixed income allocations.

The AB Global Plus Fixed Income strategy utilises an innovative, core-like strategy that is global, flexible, and risk-aware. The strategy employs an actively managed global bond strategy that invests broadly in the sovereign debt of developed nations, investment grade credits, agencies, mortgages, commercial mortgage-backed securities, and asset-backed securities. The strategy may also take opportunistic positions in high yield and emerging market debt. The strategy has been designed as a more efficient and diversified approach to core fixed income, an innovative, core-like strategy that is global, flexible, and risk-aware.

Resolution Capital is a value orientated investment manager with the objective of delivering superior risk adjusted long term returns, compared with recognised industry benchmarks. This is achieved through investment in a concentrated portfolio of carefully selected listed real estate securities with an emphasis on avoiding fundamental flaws which could reasonably result in permanent impairment of the underlying investments. Selector Funds Management Limited (SFML) is a Sydney based fund manager established in 2003. SFML's team combines deep experience in financial markets with diversity of background and thought. SFML believe in long-term wealth creation and building lasting relationships with their investors. SFML is a profitable investment firm, who maintains a strong balance sheet and carries no debt.

SFML has a 19-year track record of outperformance since inception, and continues to seek businesses with leadership qualities, run by competent management teams, underpinned by strong balance sheets and with a focus on capital management.

SFML focus on stock selection, the funds are high conviction, concentrated and index unaware. SFML portfolios aim to have low turnover and to produce tax effective returns.

SFML's philosophy is to invest sensibly for the long term. A bottom-up stock selection process is used to identify good businesses selling at a fair price. As a good business evolves into a great business, its underlying real earnings per share grows. SFML aims to capture as much of this earnings growth as possible over time, since this can translate into share price appreciation.

All research is undertaken in-house, extensive analysis includes management interviews, modelling of each company and industry channel checks.

SFML believe Culture, Financial Sustainability and ESG are intertwined. SFML consider them integral to their assessment of a business. Voting is the other half of ESG, all resolutions are documented, researched, and voted inhouse. SFML's ongoing focus on culture and financial sustainability lends itself to strong ESG outcomes. This is evidenced in areas including, retention, succession, organic growth, reinvestment, and portfolio emissions significantly lower than index emissions, coupled with our outperformance since inception.

SFML's portfolios are made up of their best ideas rather than slight variations to an index. SFML believe that simply hugging an index limits the returns to investors over the long run.

There are typically 100+ global companies that meet the fundamental characteristics that we require of all portfolio holdings (pricing power, recurring revenues, global opportunity, management strength, and financial strength) and that have successfully passed our rigorous fundamental research process to be included on what we call the Qualified Company List. From that list we then build portfolios of 25-35 companies, choosing those where we have the highest conviction in the underlying business fundamentals and that offer the most attractive opportunities based on our cash flow based valuation discipline.
